

Herbeau[®]
L'Art du Sanitaire depuis 1857

INSTRUCTIONS D'ENTRETIEN

Notre robinetterie et nos cuves sont fabriquées à partir de cuivre et de laiton de qualité supérieure.

Le cuivre et le laiton polis brillants vont naturellement se ternir mais peuvent facilement retrouver leur éclat d'origine par l'application d'une pâte à polir les matériaux.

Notre finition cuivre et laiton vieillis bénéficie d'un premier chaudronnement grâce à un procédé spécifique, créant un aspect vieilli patiné qui se développera et qui se raffinera même avec le temps.

Quand l'eau sèche, elle laisse des taches de calcaire qui peuvent altérer le processus de patinage. Pour éviter ce phénomène et même le prévenir, il est important d'essuyer les gouttes d'eau après utilisation avec un chiffon doux ou une peau de chamois.

Pour nettoyer toutes les finitions, nous vous recommandons un savon liquide doux ou du liquide vaisselle dilué (seulement s'il ne contient pas d'alcool); en aucun cas, vous ne devez utiliser des produits acides ou très agressifs.

L'application périodique sur notre finition vieillie d'un produit tel que la cire d'abeille, permet la présence d'un film protecteur et un entretien plus aisé de nos produits.

CLEANING AND MAINTENANCE INSTRUCTIONS

Our faucets and sinks are manufactured from the highest quality copper and brass. Polished copper and brass will naturally tarnish but can be restored to its original shine by polishing it with a brass polisher.

Our weathered copper and brass finish has already been pre-weathered through a specific process creating a patina, which will develop an even more refined look with age.

When water dries, it leaves behind ugly calcium stains, which may alter the weathering process in an undesirable way.

To ensure an even aging, it is important to remove water drops after use with a soft cloth or a chamois leather.

For cleaning all of our finishes we recommend a non-abrasive liquid soap or diluted liquid dishwashing detergent (but not if it contains alcohol). Under no circumstances should rough, abrasive or acidic cleaners be used.

We also recommend for our weathered finish regular application of a protective film such as bee's wax with carnuba.

81 – Hammered French Polished Copper

- Unlacquered Raw Polished Copper.
- Cannot chip or flake.
- Will tarnish and oxidize.
- Clean with mild soap/water.
- Polish with Flitz Polish or Brasso.
- Should be polished frequently to maintain shine.
- Use Renaissance Wax to maintain finish.
- Do not use abrasive materials such as Comet or Brillo Pads to clean.
- No warranty.

82 – Hammered French Weathered Copper

- Pre-weathered living finish.
- Will oxidize.
- Should be wiped dry after every use.
- Keep any acidic liquids off of this finish.
- Clean with mild soap/water.
- Do **not** use abrasive materials, metal or brass polishes to clean.
- Use Renaissance Wax to maintain finish.
- No warranty.

83 – Hammered French Weathered Brass

- Pre-weathered living finish.
- Will oxidize.
- Should be wiped dry after every use.
- Keep any acidic liquids off of this finish.
- Clean with mild soap/water.
- Do **not** use abrasive materials, metal or brass polishes to clean.
- Use Renaissance Wax to maintain finish.
- No warranty.

Guide to Care and Cleaning

Thank you for your recent Herbeau fireclay sink purchase. Continuing a tradition of handcrafted quality dating back to 1857, Herbeau fireclay sinks are designed to be strong, durable and virtually maintenance-free. The following guidelines will help your sink stay beautiful for many years to come.

Regular cleaning with a mild soap and soft sponge will help keep your fireclay sink looking like new. Simply rinse out the sink thoroughly after each use and wipe dry.

462320 Petite Luberon Fireclay Sink

Herbeau fireclay sinks resist chips, stains and scratches better than cast iron or stainless steel. Stains like coffee, tea, red wine, fruit juice, etc. can be treated with a mild gel or cleanser. We recommend the "ASTONISH" brand fireclay cleaner.

461320 Fireclay Double Sink

4609 20 Fireclay Drop-In Sink & 4610 20 Fireclay Prep Sink

For stubborn stains, mix together a solution of 50% bleach, 50% water, and let stand in the bottom of the sink for one hour. Drain the

water, then use a sponge or soft to rub out the stain.

For best results, avoid harsh abrasive cleansers or pads, as they will dull the surface of the sink.

For warranty questions or claims, please contact the showroom where the product was purchased.

LIMITED WARRANTY:

Herbeau Creations of America warrants the quality of its products (except for finishes) to be free of defects in material and workmanship for a period of five years from the date of purchase as indicated by the purchaser's receipt. Product defects attributable to abuse, misuse, improper installation, hard water, marine/outdoor environment, improper maintenance or accidental damage are not covered by any warranty.

This warranty is limited to defective parts replacement only. Labor charges and/or damages occurring during installation, repair, removal or replacement are not covered. Any incidental or consequential damages resulting from any defects in material are not included.

Finish	Warranty
(48) Polished Chrome, (49) Solibrass, (56) Polished Nickel, (57) Brushed Nickel, (65) Hammered Polished Nickel, (72) Pewter, (77) Hammered Brushed Nickel	5 Year
(50) Matte Black Nickel (lacquered), (52) Old Gold, (53) Old Silver, (60) Satin Nickel, (66) Hammered Satin Nickel, (67) Antique Lacquered Copper, (68) Antique Lacquered Brass, (71) Polished Black Nickel (lacquered), (80) Polished Lacquered Copper	2 Year
Herbeau will warranty the handpaint for as long as the original owner/purchaser owns their home.	Limited Lifetime

What is Fireclay?

Fireclay is a natural mineral material consisting of clay, silica and ash.* The master craftsmen at Herbeau use a white clay from the Limoges region of France. This type of clay is prized for its purity and texture.

First the clay is mixed with water to a honey-like consistency, then poured into a two-piece plaster mold. After the clay dries, both molds are opened and the sink is removed. The sink is then sponged to achieve a smooth finish and air-dried to prevent cracking. Once the sink has dried, a thick layer of glaze is applied by hand.

The glaze fuses with the clay, resulting in a smooth, lustrous finish. The sink is then sprayed with a mixture of finely ground glass, water and cellulose binder and put into a kiln, where it is fired at 2300°F.

*Luberon fireclay sink
in French Ivory
w/ 5701 Wooden Stand*

*Due to the organic nature of fireclay, size variations of up to ¼ inch may occur. For best results, Herbeau recommends the sink be re-measured prior to installation in a cabinet or countertop.
